REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. Applicant's comparative data in the specification at pages 13 and 14, Tables I and II indicate an unexpected increase in hot and cold tensile strengths for the binder compositions containing BHMFO, (which is a mixture of bis-hydroxymethyl furan monomers, furfuryl alcohol and di-methylolated furan, with at least 50% dimeric methylolated furan), than for binders having equivalent components with the exception of BHMFO.
3. Prior art cited on form 892 provide technological background information on furan binder resin systems. However these patented systems do not contain methylolated furan.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
